CAREER SUMMARY

Senior Technical Writer with 10+ years of experience creating customer-facing documentation for enterprise software, hardware, semiconductor, cloud, and engineering products. Expertise in developing user guides, release notes, installation manuals, configuration documentation, deployment guides, quick start guides, hardware reference materials, and troubleshooting content.

Experienced in collaborating with engineering, product management, support, and cross-functional teams to translate complex technical concepts into clear, accurate, and user-centric documentation for technical and non-technical audiences.

Proficient in Docs-as-Code methodologies, Markdown authoring, Git-based workflows, structured authoring using DITA/XML, and Agile development environments. Hands-on experience with MadCap Flare, Oxygen XML Editor, Adobe FrameMaker, and content lifecycle management.

Skilled at leveraging AI-powered documentation assistants, retrieval-based knowledge systems, and intelligent content workflows to improve documentation accuracy, accelerate content creation, enhance content discoverability, and drive continuous documentation improvements.

CORE COMPETENCIES

Hardware Documentation • Deployment Guides • Installation Manuals • Release Notes • Configuration Guides • Troubleshooting Documentation • Quick Start Guides • User Guides • Structured Authoring • Docs-as-Code • Markdown • Git • Agile Documentation • SME Collaboration • Documentation Lifecycle Management • AI-assisted Documentation

TECHNICAL SKILLS

Authoring Tools: MadCap Flare, Oxygen XML Editor, Adobe FrameMaker, RoboHelp

Structured Authoring & Markup: DITA/XML, Markdown, HTML, CSS

Docs-as-Code & Version Control: Git, GitHub, Perforce

Collaboration & Project Tools: Jira, Confluence, SharePoint, Zendesk

API Documentation: Swagger, SwaggerHub

Visual Documentation: Adobe FrameMaker, Visio, Draw.io, SnagIt, Camtasia

Methodologies: Agile, Scrum, Continuous Documentation, Rapid Release Environments

AI-assisted Documentation: Synopsys Knowledge Assistant, Writer Assistant, Microsoft Copilot, SLM RAG

WORK EXPERIENCE

Staff Technical Writer | Synopsys Inc

May 2024 – Present

- Lead end-to-end hardware/software documentation projects for digital and mixed-signal IP products, delivering high-quality user guides, application notes, command-line reference (man pages), regulatory/safety files and quick tip videos aligned with aggressive product release schedules.
- Own end-to-end documentation lifecycle, from requirement analysis to publishing, aligned with product release cycles.
- Validate documentation accuracy by testing product workflows, UI behavior, and command-line outputs to ensure alignment with actual system functionality.
- Leverage Synopsys Knowledge Assistant and Writer Assistant to draft, refine, and validate documentation, improving accuracy, consistency, and time efficiency.
- Use the SLM RAG-powered Chatbot to retrieve domain-specific information, verify feature behavior, and ensure documentation aligns with engineering intent.
- Translate complex engineering specifications into easy-to-understand documentation, helping reduce developer onboarding time and Application Engineer's troubleshooting and support time.
- Collaborate with global software, UX, firmware and product teams to ensure content adheres to usability and quality standards.
- Publish and maintain documentation in structured documentation platforms, ensuring version control and alignment with release timelines.
- Introduce structured stakeholder feedback loops and drive process improvements and automation in documentation workflows, continuously enhancing content quality through automated validation and improving internal satisfaction metrics.
- **Awards & Recognition**
SLM IP Documentation Excellence Award (2024-2025 & 2025-2026)
Received formal recognition for leading end-to-end documentation of inaugural SLM IP's (HSAT and CDM), delivering high-impact user manuals under tight timelines and earning commendation from Senior Director of R&D and leadership team for accelerating product readiness.

Technical Writer | Zafin

August 2012 – March 2024

Product Design & Cloud Engineering (2021–2024)

- Developed comprehensive documentation suites including release notes, installation manuals, API guides, contextual help, product integration manuals, and user assistance content using progressive disclosure techniques to enhance user experience in cloud-based platforms.
- Partnered with engineering teams to reduce documentation-related support tickets
- Mentored new team members and standardized onboarding content across internal platforms.

Knowledge Management (2016–2020)

- Curated a 200+ article knowledge base in Confluence, enhancing internal information discovery.
- Authored HTML help content, video tutorials, microlearning modules, and e-learning modules to improve employee onboarding.
- Led quarterly documentation audits to ensure compliance with internal standards.

Delivery Excellence (2014–2016)

- Documented internal procedures and created QMS-compliant process documents for audits.
- Created standardized documentation templates that improved process clarity across teams.

PMO/RMG (2012–2014)

- Developed RMG documentation and onboarding guides that improved cross-project resource visibility.
- Implemented document control and approval workflows to meet compliance and audit requirements.

Technical Writer | Kvaliteta Systems & Solutions Pvt Ltd

June 2011 – July 2012

- Produced proposal documentation and managed RFP content for client bids.
- Ensured uniformity and compliance across technical documentation and submission templates.

Application Engineer cum Technical Writer | Visionics India Pvt. Ltd

July 2010 – May 2011

- Developed hardware-focused documentation including installation manuals, assembly and disassembly procedures, setup instructions, maintenance guides, troubleshooting documentation and user manuals.
- Authored hardware reference materials covering component specifications, system configurations and operational procedures.
- Developed online help files and training documentation for EDWinXP electronic design automation software.
- Provided technical support and updated hardware/software documentation in response to customer feedback and product updates.
- Produced illustrations, screenshots, diagrams and visual aids to improve usability and customer understanding.

EDUCATION

B.A., English Literature - University of Kerala

Diploma in Electronics and Communication Engineering - Govt. Women's Polytechnic College

AISSCE, Science Stream - MGM Model School
